

**FAA**  
**Air Traffic Organization**

**Richard L. Day**

**Air Traffic Organization**

**Vice President, En Route and Oceanic Services**

As the Air Traffic Organization's Vice President for En Route and Oceanic Services, Rick Day is responsible for the delivery of all air traffic services to customers flying in en route and U.S.-controlled oceanic airspace. He is also responsible for the financial management associated with providing these services and for introducing new capabilities that will make flying over land and sea more efficient.

Before this position, Day served as Area Director for Eastern En Route and Oceanic Operations. In his previous position as Manager of the Air Traffic Division of the Federal Aviation Administration's Southern Region in Atlanta, Day had direct responsibility for the safety and efficiency of all air traffic services in the region.

Before arriving in Atlanta, Day held the position of Assistant Air Traffic Division Manager in the Central Region. He also served as the acting Regional Administrator for Central Region for several months of his tenure in the region.

Day holds a bachelor's degree in management and human relations from Mid-America Nazarene University, and an associate's degree in general studies from Kent State University.

Day chartered and was the first president of the Kansas City Metropolitan Chapter 293 of the Federal Managers Association. He also spent time as an instructor at the Mike Monroney Aeronautical Center.
